Define a common property for the numbers located in each 8 square

- A. _____
 - B. _____
 - C. _____
 - D. _____
 - E. _____
 - F. _____
 - G. _____
 - H. _____
 - I. _____
 - J. _____
 - K. _____
 - L. _____
-

Solution to the Problem:

- A. Prime Numbers
- B. Multiples of Five
- C. Palindromes (Numbers which read the same backwards and forwards)
- D. Multiples of Seven
- E. Squares
- F. Sum of the Digits = 14
- G. Cubes
- H. Sum of the First Two Digits = Last Digit
- I. Digits are in Ascending Order
- J. Factors of 24
- K. Sum of the Digits = 13
- L. Difference of the First Two Digits = Last Digit

There was no correct solution to problem 17

Rules

1. Anyone is eligible to participate. Each solution is to be the work of one individual without any input from faculty or others. An answer must be accompanied by appropriate justifications to be considered correct.
2. The solution is to be submitted with the solver's name, email, year in school (if applicable), local phone number, and local address. If you are submitting this for possible credit in a class, include your class number and instructors name.
3. The solution is to be typed or legibly written. Solutions must be submitted to the by 2 p.m. on the due date.
4. Entries will be graded on clarity of exposition and elegance of solution. An award of **GEL10** will be given for the best correct solution. In the case of a two-way tie, the award will be split. If there are more than two best solutions, a drawing will be held to determine two award winners.
5. Graduate students, faculty, and members of the general public are encouraged to submit solutions, but they will not be considered.
